

Formulas and Production Process of Surfactants, Disinfectants, Cleaners, Toiletries, Sanitizers, Antibacterial and Beauty Products, Personal Care Products, Health Care Products

(Body Lotion, Hair Gel, Floor Cleaner, Phenyl, Glass Cleaner, Liquid Detergent, Detergent Powder, Toilet Cleaner, Detergent Soap, Liquid Soap, Hand Wash, Hand Sanitizer, Herbal Shampoo, Mosquito Coil, Herbal Cream, Shaving Cream, Henna Based Hair Dye, Utensil Cleaning Bar, Air Freshener, Shoe Polish, Tooth Paste, Naphthalene Ball)

Introduction

Household cleaners are some of the most widely purchased consumer products. Other than plastic and synthetic fibers materials, there is probably not another class of chemical products that people come into contact with more frequently. We buy them in grocery stores, store them in our homes, use them where we eat, sleep, bathe, and work, and dispose of them down the drain after use.

The term surfactant comes from the words surface active agent. A surfactant is briefly defined as a material that can greatly reduce the surface tension of water when used in very low concentrations.

Surfactants, or surface active ingredients, are the wetting and foaming agents which form the basis for most aqueous cleaners. Anionic, nonionic, and amphoteric surfactants are used mainly for cleaning. Cationic surfactants are often used as antimicrobials. The surfactants market size is 30.64 Billion in 2016 and is projected to reach USD 39.86 Billion by 2021, registering a CAGR of 5.4% between 2016 and 2021.

The global surfactants market is expected to reach a valuation of US\$28.8 billion by 2023, increasing at a 4.20% CAGR upon its 2014 value of close to US\$20.3 billion.

Antimicrobial ingredients were found in a number of products. As was the case with general purpose cleaners, quaternary ammonium compounds were most common. Also found were sodium hypochlorite and phenolic derivatives.

Disinfectants contain antimicrobial agents, such as pine oil, sodium hypochlorite, quaternary ammonium compounds or phenols, which kill bacteria and viruses on surfaces. A surface should be free of heavy soil for effective disinfection. Disinfectant cleaners contain surfactants and builders to remove soil in addition to antimicrobial agents to kill germs.

Disinfectants are products whose major function is to kill bacteria on a surface, but which are not necessarily formulated to remove dirt, stains, or other soils.

The global home healthcare market is expected to reach USD 349.8 Billion by 2020 from USD 227.5 Billion in 2015, at a CAGR of 9.0% during the forecast period. The growth of this market is mainly driven by factors such as rising geriatric population across the globe, growing need of cost-effective healthcare delivery due to increasing healthcare costs, rising incidences of chronic diseases, and technological advancements in devices.

However, changing reimbursement policies, limited insurance coverage and risks to personal safety of home care workers are the factors restraining the growth of this market to a certain extent.

The market size of Industrial & Institutional (I&I) cleaning chemicals was USD 39.24 Billion in 2014, and is projected to reach USD 50.24 Billion by 2020, at a CAGR of 4.2% between 2015 and 2020. Rising awareness on health & hygiene, safety liability on the part of the company or an institution and growing demand from the application industries are the major drivers for the market.

This handbook contains processes formulae of various products and providing information regarding manufacturing method. It covers raw material suppliers, photographs of plant & Machinery with supplier's contact details and some plant layout & process flow sheets. The Major Contents of the book are phenyl, floor cleaner, glass cleaner, toilet cleaner, mosquito coils, liquid detergent, detergent powder, detergent soap, naphthalene balls, air freshener, shoe polish, tooth paste, shaving cream, liquid soaps and hand washes, herbal shampoo, henna

based hair dye, herbal creams, utensil cleaning bar, hand sanitizer etc. 1/15 It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of surfactants, disinfectants, cleaners, toiletries, personal care products manufacturing.

Table of Contents

1. Introduction

Disinfectant

Advantages & Disadvantages of different

Classes of Disinfectants

Niir PROJECT CONSULTANCY SERVICES

An ISO 9001:2008 Company

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.

We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Industry Trends*
- *Market Research Reports*
- *Technology Books and Directory*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we serve?

- *Public-sector Companies*
- *Corporates*
- *Government Undertakings*
- *Individual Entrepreneurs*
- *NRI's*
- *Foreign Investors*
- *Non-profit Organizations, NBFC's*
- *Educational Institutions*
- *Embassies & Consulates*
- *Consultancies*
- *Industry / trade associations*

Sectors We Cover

- *Ayurvedic And Herbal Medicines, Herbal Cosmetics*
- *Alcoholic And Non Alcoholic Beverages, Drinks*
- *Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin*
- *Activated Carbon & Activated Charcoal*
- *Aluminium And Aluminium Extrusion Profiles & Sections,*
- *Bio-fertilizers And Biotechnology*
- *Breakfast Snacks And Cereal Food*
- *Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling*

- *Bamboo And Cane Based Projects*
- *Building Materials And Construction Projects*
- *Biodegradable & Bioplastic Based Projects*
- *Chemicals (Organic And Inorganic)*
- *Confectionery, Bakery/Baking And Other Food*
- *Cereal Processing*
- *Coconut And Coconut Based Products*
- *Cold Storage For Fruits & Vegetables*
- *Coal & Coal Byproduct*

- *Copper & Copper Based Projects*
- *Dairy/Milk Processing*
- *Disinfectants, Pesticides, Insecticides, Mosquito Repellents,*
- *Electrical, Electronic And Computer based Projects*
- *Essential Oils, Oils & Fats And Allied*
- *Engineering Goods*
- *Fibre Glass & Float Glass*
- *Fast Moving Consumer Goods*
- *Food, Bakery, Agro Processing*

- *Fruits & Vegetables Processing*
- *Ferro Alloys Based Projects*
- *Fertilizers & Biofertilizers*
- *Ginger & Ginger Based Projects*
- *Herbs And Medicinal Cultivation And Jatropha (Biofuel)*
- *Hotel & Hospitability Projects*
