Introduction

Button Mushroom is the most popular mushroom variety grown and consumed the world over. In India, its production earlier was limited to the winter season, but with technology development, these are produced almost throughout the year in small, medium and large farms, adopting different levels of technology.

In the last ten years, large numbers of commercial units have been built by the entrepreneurs/ farmers throughout the country for the production of button mushrooms.

A photograph of several white button mushrooms in a woven basket, set against a blue and green striped background. The mushrooms are fresh and have a smooth, white cap with a slightly gilled underside. The basket is made of light brown wicker and sits on a green fringed cloth. The background is a blue and green striped fabric.

However, commercial production of white button mushroom was initiated in the hilly regions of the country (17- 18°C) like Chail (Himachal Pradesh) Kashmir and Ooty (Tamil Nadu). The white button mushroom (*Agaricus bisporus*) is grown on compost based on various agricultural wastes and animal manure.

White button mushrooms are grown all over the world and account for 35-45 % of the total mushroom production. In India, large units with production capacities between 2000 – 3000 tonnes/annum, have been set up mainly as export oriented units in the southern, western and northern regions.

A large number of small units without climatic control equipment exist throughout India and function during the autumn and winter months only. As a whole it is a good project for new entrepreneurs to invest.

Market Outlook

The daily demand for mushroom is around 75 to 100 tonnes in Tamil Nadu alone.

The global market for mushrooms was valued at \$29,427.92 million in 2013. This market is projected to grow at a CAGR of 9.5% from 2014 to reach \$50,034.12 million by 2019.

Button mushrooms were the first mushrooms to be commercially exploited on an industrial scale and hence are more popular than other types. The button mushrooms segment contributed around 36.1% to the total Mushroom Market in 2013.

The Mushroom market had a value of \$35 billion in 2015. Between 2016 and 2021, the market is expected to grow by 9.2 percent. This would bring its size to nearly \$60 billion in 2021.

Global mushroom market value is expected to exceed USD 50 billion in the next seven years due to growing mushroom demand in from the recent past. Mushrooms are considered good for health as they contain negligible sodium and gluten content. Low fat and cholesterol content is presumed to result in higher mushroom acceptance among consumers.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- 
- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
 - **The report provides a glimpse of government regulations applicable on the industry**
 - **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on **Button Mushroom** ” provides an insight into the **Button Mushroom** market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of **Button Mushroom** project. The report assesses the market sizing and growth of the Indian **Button Mushroom** Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- 
- **Good Present/Future Demand**
 - **Export-Import Market Potential**
 - **Raw Material & Manpower Availability**
 - **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the **Button Mushroom sector in India along with its business prospects. Through this report we have identified **Button Mushroom** project as a lucrative investment avenue.**
