Phoenix dactylifera, commonly known as date or date palm, is a flowering plant species in the palm family, *Arecaceae*, cultivated for its edible sweet fruit. Although its place of origin is unknown because of long cultivation, it probably originated from lands around Iraq. The species is widely cultivated and is naturalized in many tropical and subtropical regions worldwide.

Climate and Soil

Date palm is very exacting in its climatic requirement, which according to an Arab saying should grow with its feet in running water and its head in the fire of the sky. The successful cultivation of date palm requires a long summer with high day as well as night temperature, a mild winter without frost, and absence of rain at the time of flowering and fruit setting with low relative humidity and plenty of sunshine. It is estimated that finest date varieties require 3,300 units of heat (base 10°C) for full maturity of its berries.

The heat unit summation must occur from pollination until full maturity of berries. This period should be rainless and dry. This is in contrast to its native home in Mediterranean region where summers are dry with rainy winters to allow fruit development from May through September – October. In Indian subtropics, fruiting period is confined only from February-July whereas ripening period coincides with rainfall. Therefore, fruits do not reach ripening stage and should be harvested at earlier stage of fruit development.

Market Outlook

The global production of date's fruit is about 5.4 mn metric tonnes per year. The five largest producers are Egypt, Iran, Saudi Arabia, Pakistan, & Iraq. Approximately, 93% of dates harvested in the country are consumed within.

Date fruits have iron, potassium and calcium content. They are highly delicious and are a rich source of sugar (70-75%). One kg of fresh fruits of date palm gives about 3,000 calories of energy.

Global Leading Countries Growing Fresh Dates

Rank	Country	Annual Production of Fresh Dates in Metric Tons
1	Egypt	1,084,529
2	Iran	947,809
3	Saudi Arabia	836,983
4	Iraq	675,440
5	Pakistan	556,608
6	United Arab Emirates	533,701
7	Algeria	485,415
8	Sudan	435,668
9	South Sudan	432,100
10	Oman	239,397

Date Fruit Processing, value added Products and utilization

➤ **Medical Alcohol from Date Juice Concentrate**

Date is one of the best fruits, which contains fructose as sugar ingredients, which is totally fermentable sugar and can be completely converted to ethyl alcohol by fermentation process. There are few expensive fabricating companies who can design the distillery plants and fabricate the plants. There is very good demand of medical alcohol.....[Read more](#)

➤ **Animal Feed Using Date Pits, Discarded Dates and Other Ingredients**

There is large use of animal feed in India, Middle East and also in the European Countries. It will help to increase the animal health. Most of the raw ingredients available in our country, most of the European Countries, and also in the Middle East. It is used as feed for the animal growth and nutrition. Due to globally increase of population there is sharp decrease of green fields used for animals.....[Read more](#)

Reasons for buying our report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**
