Introduction

Food processing is the transformation of raw ingredients, by physical or chemical means into food, or of food into other forms. Food processing combines raw food ingredients to produce marketable food products that can be easily prepared and served by the consumer.

Food processing typically involves activities such as mincing and macerating, liquefaction, emulsification, and cooking (such as boiling, broiling, frying, or grilling); pickling, pasteurization, and many other kinds of preservation; and canning or other packaging.

Food Production

Generally the transformation of ingredients into finished food products is called as Food Production. Food manufacturing industries that take raw food products and convert them into complete and marketable food items. The food production process includes the processing of raw materials like fruits, vegetables and grains in their harvested forms and meat directly after the butchering process and processes these into the types of food products that are available for the consumers.

The range of Food production varies from minimal processing, such as cleaning and packaging, to the complicated processes involving lots of additives, ingredients and methodology as well. The process of Food production processes develop products with longer shelf lives than raw food ingredients.

Market Outlook

Food Processing Industry (FPI) in India is a sunrise sector that has gained prominence in the recent years. FPI serves as a vital link between the agriculture and manufacturing sectors of the economy.

Strengthening this link is critical to reduce wastage of agricultural raw materials, improve the value of agricultural produce by increasing shelf-life as well as by fortifying the nutritive value of the food products and ensure remunerative prices to farmers as well as affordable prices to consumers.

FPI contributes around 9% of the manufacturing GDP.

Food industry was valued at \$ 39.71 billion in 2013.

With a growth rate of 11 percent, food industry is expected to be valued at \$ 65.4 billion by 2018.

India's exports of processed food and related products increased at a compounded annual growth rate of 21.9% to \$36.1 billion. Further, the Indian food industry is estimated to grow to about \$200 billion by 2015.

India is one of the world's major food producers. India's food processing sector covers fruit and vegetables; meat and poultry; milk and milk products, alcoholic beverages, fisheries, plantation, grain processing and other consumer product groups like confectionery, chocolates and cocoa products, Soya-based products, mineral water, high protein foods etc. We cover an exhaustive database of an array of suppliers, manufacturers, exporters and importers widely dealing in sectors like the -Food Industry, Dairy processing, Indian beverage industry etc.

We also cover sectors like dairy plants, canning, bottling plants, packaging industries, process machinery etc. The most promising sub-sectors includes - Soft-drink bottling, Confectionery manufacture, Fishing, aquaculture, Grain-milling and grain-based products, Meat and poultry processing, Alcoholic beverages, Milk processing, Tomato paste, Fast-food, Ready-to-eat breakfast cereals, Food additives, flavors etc.

The Food Processing sector in India, a sunrise sector, is poised for immense growth and greater contribution to the world food trade.

The annual growth rate of the food processing sector is more than 7% and the online food delivery industry grew by 150% in 2016.
