# **Introduction**

**Goa has a well-developed social, physical and industrial infrastructure and virtual connectivity. The state is highly dependent on foreign exchange, which has helped fuel the growth of resorts, helped in state beautification, hotels and other businesses related to tourism.**

## ■ Agriculture

**The major food crops in the State are rice, paddy, maize, jawar, bajra and ragi. While, main cash crops are coconut, cashew nut, arecanut, sugarcane and fruits like pineapple, mango and banana. Out of the total geographical area of 3702 sq km, the State has a rich forest cover of about 1424.46 sq km. Of this, 1224.46 sq km has been classified as Government forest (of which about 62% has been brought under Protected Areas (PA) of Wildlife Sanctuaries and National Parks) and the rest as private forests.**

## ▪ Fisheries and Aquaculture Sector

**Fishing is another traditional and important economic activity of the State. Goa, being located on the west coast of India, has a coastline extending over 100 Km and inland waterways of another 250 Km, rich in marine wealth. Prawns, the valuable foreign exchange earner, mackerels, sardines, etc. are available in plenty in Goa coast. Fish is a protein rich food. It forms a chief component in the diet of about 90% of the population of Goa. Capture fisheries of Goa (India) constitute a highly productive sector. They remain one of the major sources of valuable food and employment and a net contributor in the foreign exchange earnings.**

## **Tourism**

**Tourism in India is the largest service industry, with a contribution of 6.23% to the national GDP and 8.78% of the total employment in India. Tourism has become an important industry in many countries of the world, both in the east and the west. Various initiatives are being taken by the Government and other organizations to promote tourism here. Tourism is one of the fastest growing industries in the world.**

## ■ Mineral and Mining

**The State of Goa is a tiny emerald land on the west coast of the Indian Peninsula. The rich and varied mineral resources of the State have contributed handsomely towards the development and industrialization of the State. The State of Goa has an important position in the Mineral Map of the Country. The production of iron ore accounts to about 13% of the iron ore production in India and its exports accounts to about 35% of the Country exports. The State of Goa is endowed with Mineral Resources. Iron ore, Manganese ore, Bauxite are minerals of economic importance.**

## ▪ Waste Management and Recycling

**Goa produces around 300 tonnes of garbage, but with municipal bodies. The proliferation of plastic wastes in the urban and village environments of Goa, and the abysmally hopeless and inadequate arrangements of municipalities and authorities for the disposal of this plastic litter, are subjects which many environment NGOs and citizens have expressed anguish over right from the inception of the Goa Environment Federation (GEF). Goa receives around 2 million of domestic and international tourists per year.**
