***Manufacturing Business of Quartz Slabs,
Engineered Stone, Composite Materials,
Kitchen Countertops, Artificial Stone***

Introduction

Quartz Surfaces a man-made product, comprises majorly of quartz, one of nature's strongest material and a mix of bonding agent, pigment and additives. Similar in appearance to natural stone, quartz enjoy certain innate benefits not available with natural material namely durability, strength and stain and heat resistant qualities. Further, natural stones are also porous which leaves room for bacteria to get into fissures and pores where it can be tough to eradicate, while on the other hand Engineered stone doesn't absorb liquids resulting in easier cleaning and more effective than natural stone.

Engineered stone is also the fastest growing material to be used in the countertop industry. Rapid growth of the product has been driven by the material's superior physical attributes relative to other countertop materials, its attractive relative value, as well as broad array of colors and ease of fabrication. The growth is expected to remain strong as it gains further awareness and acceptance in several existing and newer markets - the product is fairly matured and developed in Israel and Australia, it is still at a nascent stage in markets like USA and Canada, two of the largest markets in the world.

Quartz is the most abundant mineral on Earth and one of the hardest, so it is "hardly" surprising that manufacturers saw its great potential for a surface material more than 50 years ago. Since that time, quartz countertops have grown in popularity as homeowners discovered what the earliest quartz pioneers knew - when the natural mineral quartz is improved upon by man's ingenuity, quartz countertops can compete with other natural stone countertops in every way.

Market Outlook

The global countertops market is expected to grow at a healthy rate during the projected period 2017-2021. The growth in countertops market is expected on account of many growth drivers such as increase in number of food serving outlets, preference for spacious kitchens and multiple bathrooms, upsurge in disposable income and rise in number of hotel rooms worldwide.

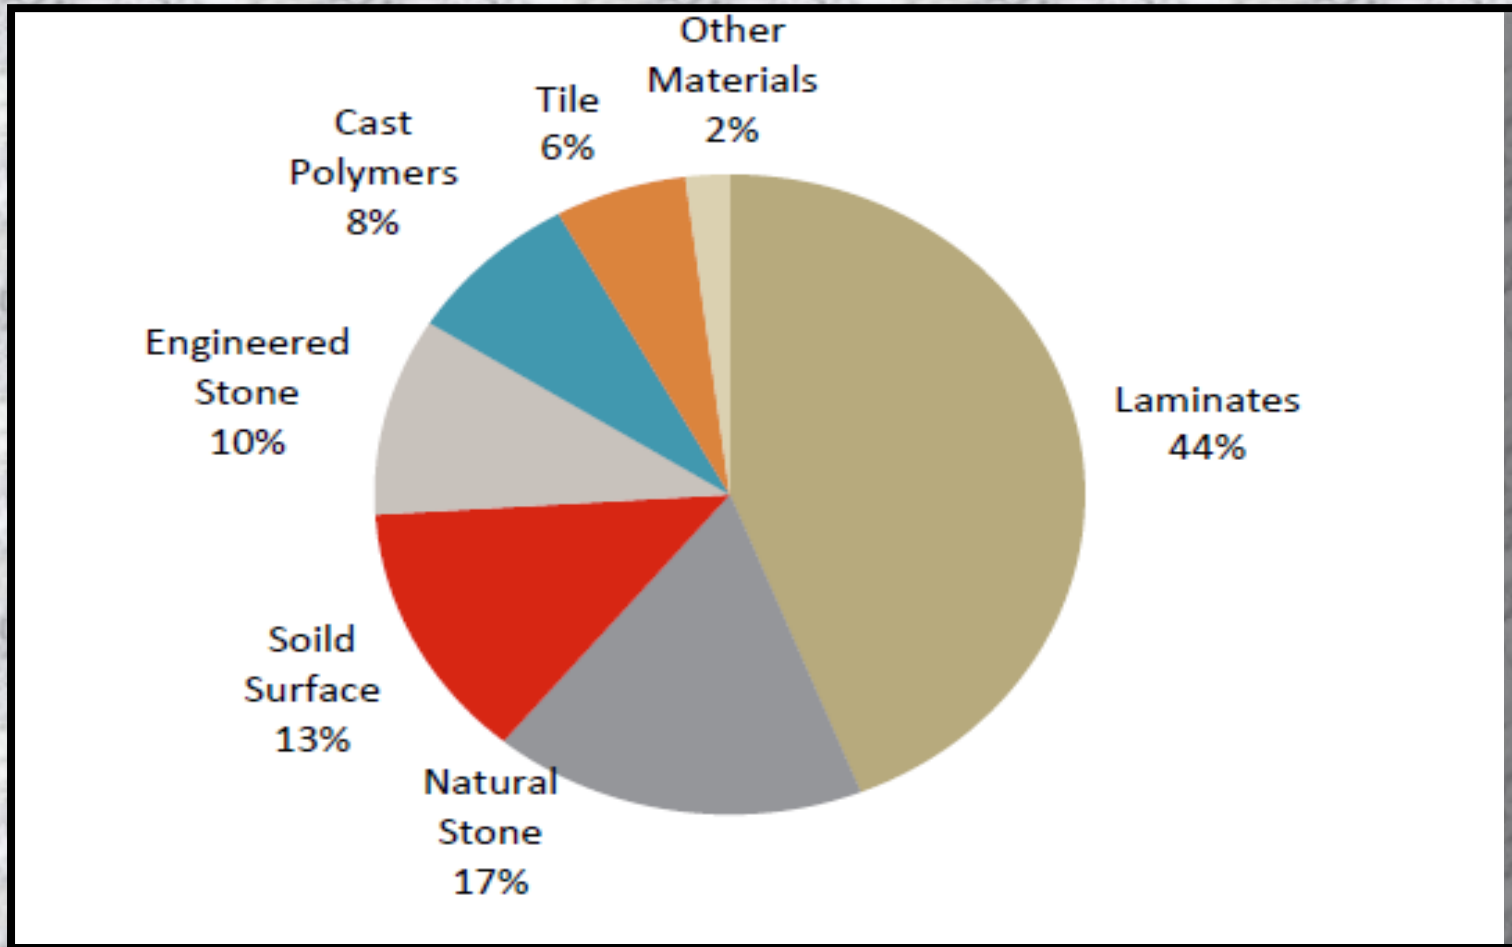

The countertop market can be segmented on the basis of material type and end sector. On the basis of material type, the global countertop market can be further segmented into granite, solid surfaces, quartz, laminates and marbles. On the basis of end sector, the market can be divided into residential and commercial.

USA's engineered stone imports amounted to 66.1 million sq. ft. during 2015, higher by 55.1% over preceding year.

Demand for natural-stone countertops in the US market to grow 7.6% annually until 2017. Engineered stone, to account for 77 million ft² in US countertops market annually by 2017, with an annual growth rate of 7.4%.

Engineered Quartz Countertops market is expected to exhibit higher CAGR. "Rising demand across various residential sectors, burgeoning construction activities in the developing regions, increasing construction of residential housing units coupled with rapid demand from the remodelling activities is anticipated to propel the growth of engineered quartz countertops market in the forecast period"

US Countertop Demand 2017 (750 million ft²)

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Quartz Slabs” provides an insight into the Quartz Slabs market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Quartz Slabs project. The report assesses the market sizing and growth of the Indian Quartz Slabs Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Quartz Slabs sector in India along with its business prospects. Through this report we have identified Quartz Slabs project as a lucrative investment avenue.
