Essential Oils Extraction Business

Polianthes tuberosa, is commonly known as Rajanigandha in India due to its night blooming fragrant flowers. It is small bulbous herb reaching upto height of 2-3 feets. It bears aromatic flowers and generally grown for oranmental purpose. The waxy, white and fragrant flowers on long spikes are mostly used as cut flowers for making garlands and extracting essential oil.

There are also few medicinal uses of Polianthes tuberosa. Flowers are used in perfume industry and also diuretic and emetic activity. Bulbs are used as antigonorrhoea, diuretic, emetic and for curing rashes in infant.

Tuberose oil is extracted from Polianthes tuberosa of the Agavaceae family and is also known as tuberosa and tubereuse.

Essential oils, also called volatile odoriferous oil, are aromatic oily liquids extracted from different parts of plants, for example, leaves, peels, barks, flowers, buds, seeds, and so on. They can be extracted from plant materials by several methods, steam distillation, expression, and so on. Among all methods, for example, steam distillation method has been widely used, especially for commercial scale production. Essential oils have been widely used as food flavors. food products.

Essential oils have been known to possess antioxidant and antimicrobial activities, thereby serving as natural additives in foods and

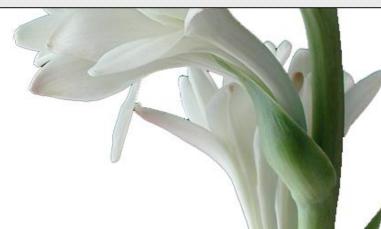

Market Outlook

Essential Oil Market is expected to reach \$11.5 billion by 2022, with a CAGR of 10.1% from 2016 to 2022. Essential oils, also known as volatile oils/aetherolea/ethereal oils, are derived from leaves, stems, flowers, bark, roots, or other parts of a plant.

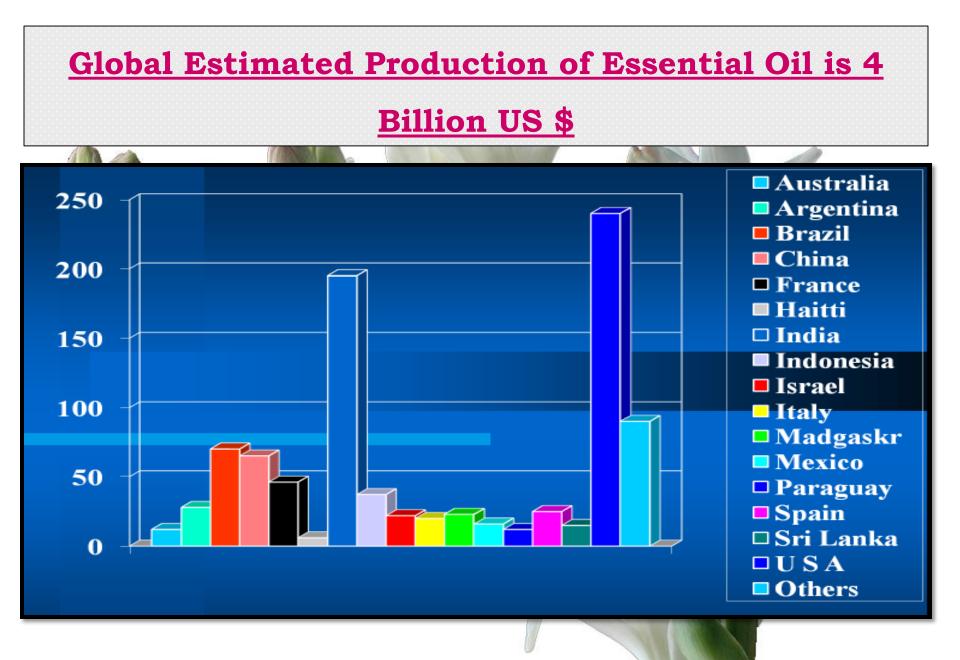

Essential oil is obtained from various herbs and plants, such as orange, eucalyptus, corn mint, peppermint, citronella, lemon, lime clover leaf, and spearmint, using distillation methods such as steam and water distillation. An essential oil contains volatile aroma compounds and real essence of the plant from which it is derived.

Essential oils are also widely utilized in cleaning & home products owing to their superior antibacterial and antiseptic properties. Customers are keen on specialized products as various applications require specific characteristics and ingredients. The global essential oil market is mainly driven by increasing demand for natural and organic care products due to increasing health issues among the consumers.

Global essential oil market demand was 177 tons in 2015 and is expected to grow at a CAGR of 7.3% from 2015 to 2020, which market size to reach \$9.58 Billion by 2020.

Reasons for Buying our Report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product

This report provides vital information on the product like it's characteristics and segmentation
This report helps you market and place the product correctly by

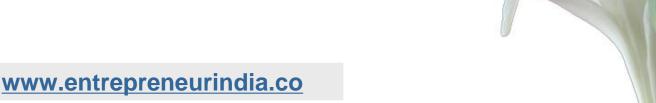

identifying the target customer group of the product

• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials • The report provides a glimpse of government regulations applicable on the industry • The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business

decisions

• Our research reports broadly cover Indian markets, present analysis,

outlook and forecast for a period of five years.

- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

Scope of the Report

The report titled "Market Survey cum Detailed Techno Economic Feasibility Report on Extraction of Oil from Rajnigandha provides an insight into the Rajnigandha Oil Extraction market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Rajnigandha Oil Extraction project. The report assesses the market sizing and growth of the Indian Rajnigandha Oil ExtractionIndustry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Rajnigandha Oil Extractionsector in India along with its business prospects. Through this report we have identified Rajnigandha Oil Extraction project as a lucrative investment avenue.
