

Investment Opportunity in Edible Oil Manufacturing Unit.

Edible Oil Refinery Plant

(Sunflower, Groundnut & Rice Bran Oil).

Cooking Oil Production.

Introduction

Sunflower Oil:

Sunflower oil is the non-volatile oil compressed from the seeds of sunflower. Sunflower oil is commonly used in food as frying oil, and in cosmetic formulations as an emollient. It is commonly used as cooking oil as well as in cosmetic formulations due to its emollient properties. Sunflower seed oil is extracted from the black seeds as well as the entire flower.

The sunflower oil benefits are surplus. Sunflower oil has a large number of benefits that help in keeping the body healthy and strong.

Though it is included in the list of high fat items, it is gaining popularity as cooking oil due to its wide variety of health-enhancing nutrients. The perfect balance of monounsaturated and polyunsaturated fats makes it perfect for reducing the levels of bad cholesterol. Thus, more and more people are incorporating it in their diet. Some of the benefits of sunflower oil for health are given below.

Groundnut Oil:

Groundnut is also known as goober, pinder, groundnut, earthnut and ground pea. Peanut oil is natural sweet and flavoured edible oil. Refined peanut oil has a light yellow color and a neutral taste.

This is extracted from pressing peanut kernels. In addition to extracting the oil, peanuts are eaten raw or roasted, and used in cooking and bakery as well. Peanut oil is very high on energy, has a very high burning and smoking point, and contains monounsaturated fats, Vitamins A, D and E Groundnut oil, also known by other names such as groundnut oil and arachis oil, is a type of vegetable oil commonly used in cooking that is derived from peanuts.

Peanut oil comes in a number of varieties, including refined, unrefined, roasted, and cold-pressed, which have slight differences in their nutritional value and health benefits. Generally, people use peanut oil in their cooking for the interesting flavor that it gives to the food, particularly if you use the roasted variety, as well as the fact that it is healthier than many other types of oil.

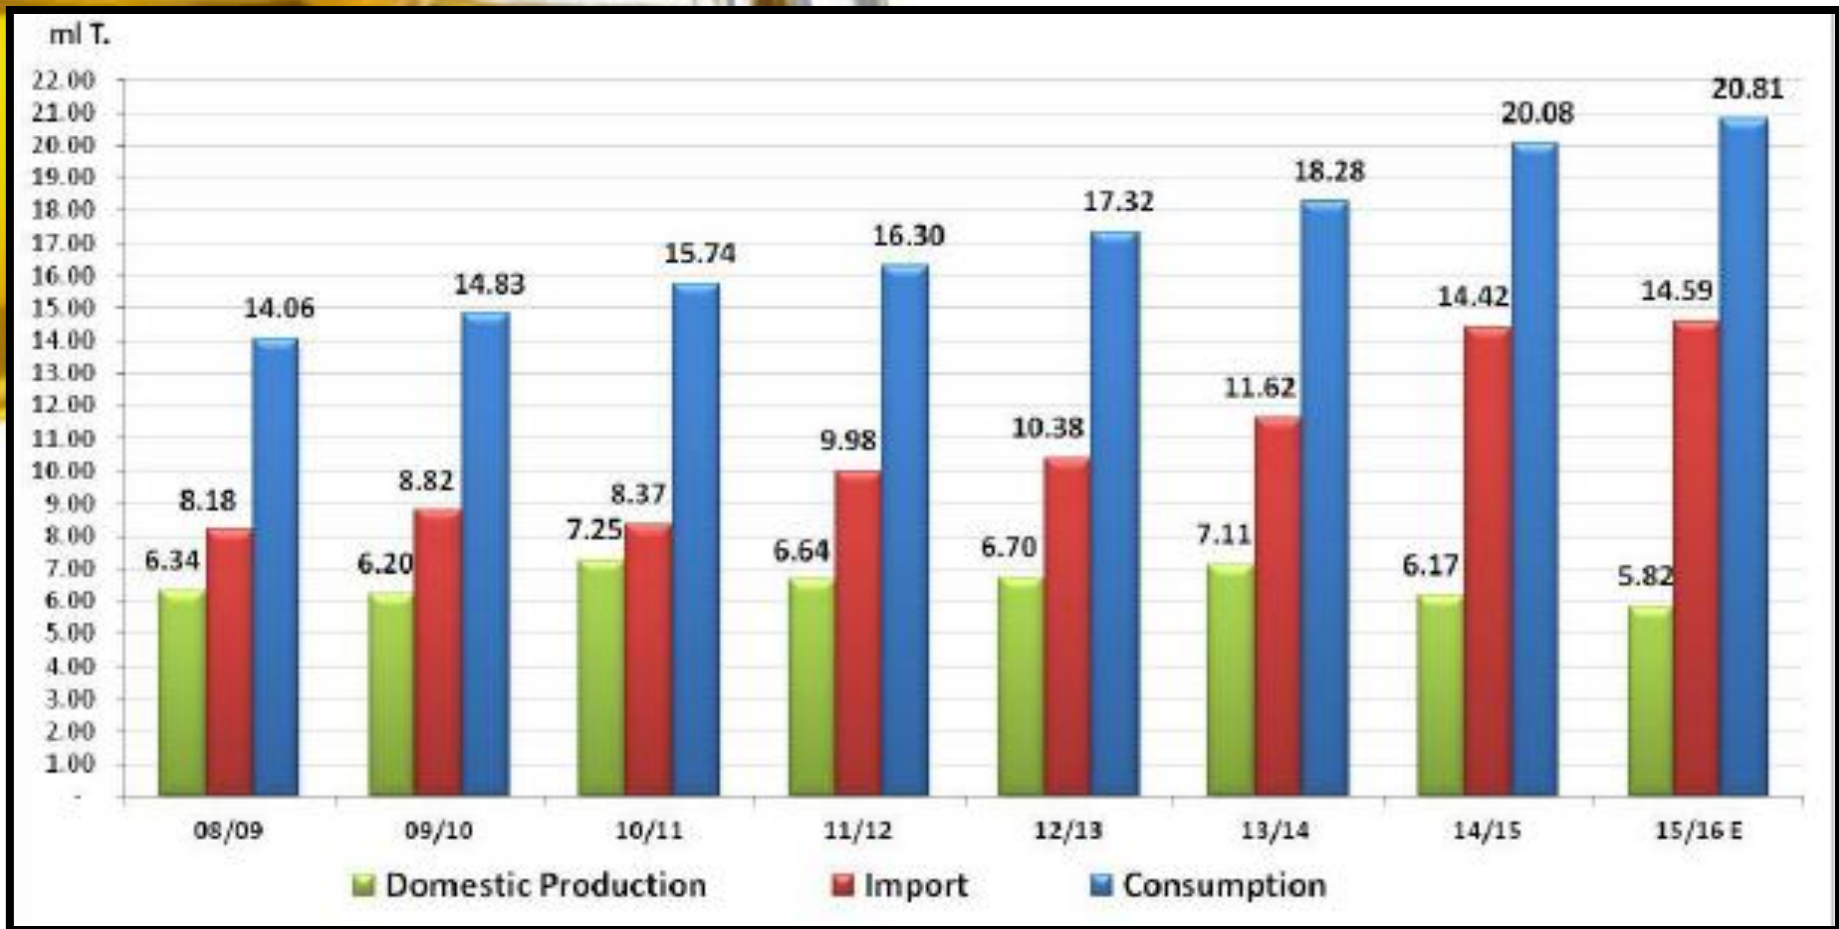

Rice Bran Oil:

Rice bran oil is an increasingly popular vegetable oil that offers many advantages over standard vegetable oils that millions of people commonly cook with all over the world. Rice is one of the most widely available and popular foodstuffs on the planet, and rice bran oil is extracted from the germ and the husk of rice kernels.

Rice bran oil is most commonly used in Asian cultures, including Japan and China, primarily because rice is already such a staple food in their cuisines. However, rice bran oil is becoming increasingly popular in other parts of the world because of its relatively low price point and the many health benefits that come from using it in food preparation.

Domestic Edible Oils Production, Import & Consumption

Edible oil industry in the India, which is hugely driven by import of edible oils, registered revenues of INR ~ billion in FY'2012. With an increase in consumption of edible oils in the country, the revenue of edible oils had inclined by 30.8% compared to FY'2011. Each segment in the edible oil industry is subject to a gamut of different factors such as price hikes and change in government policies play an important role in determining their respective revenues. The edible oil industry in the India has grown at a CAGR of 13.1% from INR 638.4 billion in FY'2009 to INR ~ billion in FY'2014.

The competition in India edible oil market is highly fragmented owing to the presence of a large number of organized as well as local and unorganized players. The major players are Cargill, Adani Wilmar, Ruchi Soya, Agrotech Foods, and others.

India is the second-largest producer of Rice bran oil after China and the country has the potential to produce more than 1.4 million tonnes of rice bran oil. Rice Bran Oil market in India is still at its nascent stage, but the segment has showcased immense growth in the past few years. In FY'2012, the market for Rice Bran Oil in India grew at a sizeable growth rate of 14.0%.

The Indian per capita consumption for edible oil is expected to grow from the current consumption levels of ~16kg to ~24 kg's by 2020 with a conservative CAGR of ~6% & 1% (Historical Growth rates) for Total edible oil consumption and Population respectively.

Edible oil consumers in India are increasingly turning towards Sunflower Oil, which has witnessed an increase in consumption by about five-fold rise over the past 15 years.

Sunflower oil market in India has showcased a promising growth in revenues during the past few years. The sunflower oil market revenues during the period FY'2009-FY'2014 has surged at a healthy CAGR of 3.2%.

The edible oil market is expected to be dominated by various national and multinational players due to the increasing import dependence of the country in the near future. Rice bran oil market are expected to be the fastest growing category in the entire edible oil segment with Oils such as Mustard, Sunflower, Groundnut and Cottonseed tend to remain region specific in the near future with a moderate fluctuation in their prices.

India imports around 15 million tonnes of edible oil to meet the country's local consumption of around 25 million tonnes. Countries like Malaysia and Indonesia continued to promote their own refineries through levy of export duty on crude oil and exemption on refined oil.

The global edible oil market is anticipated to witness a substantial growth owing to increasing popularity of unrefined, unprocessed, healthy, and organic oil. In the coming years, vegetable oils with low cholesterol, fat, and calories are likely to gain high response due to growing health awareness among people across the world. In addition, major improvement in retail network, increasing crop yields, oil production, and growing economies are some of the prominent factors supporting the growth of the global edible oil market.

The market for edible oil can be segmented on the basis of type, end-users, and geography. In terms of type, the market can be classified into palm oil, canola oil, olive oil, sunflower oil, specialty blended oil, and corn oil. Increasing consumption of fried foods has significantly increased the demand for edible oils. Based on end-users, the market for edible oil can be divided into food processor, food service, and retail. Improving living standards, changing dietary habits, and increasing consumer preference for healthy edible oil supporting the growth of the global edible oil market.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Edible Oil Refinery ” provides an insight into the Edible Oil Refinery market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Edible Oil Refinery project. The report assesses the market sizing and growth of the Indian Edible Oil Refinery Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Edible Oil Refinery sector in India along with its business prospects. Through this report we have identified Edible Oil Refinery project as a lucrative investment avenue.

▪ Detailed Project Reports

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)
