Adult Pull-up Diapers Production.
Adult Diapers Manufacturing
Business**

Introduction

An adult diaper is a diaper specially designed to worn by a person suffering from problems like incontinence, mobility impairment or severe diarrhea. Different types of adult diapers available in the market are: all in one cloth adult diaper, contour cloth adult diaper, Adult Pull-up diapers, waterproof pants, disposable adult diapers and adult swim diapers.

Adult pull ups also known as pull ons or disposable underwear come with elastic waistbands and are used by wearers who prefer using the bathroom when possible. Pull ons are available in a variety of waist sizes and come in elastic waist bands for a comfortable fit. Pull-on styles are easy to put on as well as remove, making them a far more convenient option to use and a good choice for wearer who uses the bathroom instead of using a diaper. Many wearers say pull-ups offer more dignity compared to brief diapers, as they resemble normal underwear.

Uses & Selection of Diapers

Adult:

- ***People with medical conditions which cause them to experience urinary or fecal incontinence often require diapers because they are unable to control their bladders or bowels.***
- ***People who are bedridden or in wheelchairs, including those with good bowel and bladder control, may also wear diapers because they are unable to access the toilet independently.***

- ***Those with cognitive impairment, such as dementia, may require diapers because they may not recognize their need to reach a toilet.***
- ***Specialty diapers are required for swimming or pool therapy. These are known as swim diapers or containment swim briefs. They are intended mainly for fecal incontinence, however they can also be useful for temporary urine containment, to maintain dignity while transferring from change room to pool.***

An adult diaper is a disposable diaper consist of an absorbent inserted in between two non-woven fabric structure. This helps in avoiding the leakage, maintain the body fluid level and improve comfort. Fluff pulp, polypropylene polymer, film, polypropylene fiber, polyester fiber, bio component fiber, rayon/fiber, cotton and other are some of the raw materials used in adult diapers. Diapers can be used by adults with various conditions, such as severe diarrhea, dementia, incontinence or mobility impairment.

Growing aging population, urbanization and increased awareness of treatment methods for urinary incontinence are expected to be the major drivers for the global adult diaper market. Aging population, economic affluence and improvement of the healthcare sector are expected to support the adult diaper market growth in the near future. However, volatility in prices of raw material may curb the demand for adult diaper within the forecast period. Also, ever increasing demand for the new products which includes body fit, skin friendly, superior absorption, stretchable, stylish and odor free is expected to grow new opportunities in the adult diaper market.

The adult diaper market is segmented on the basis of different products including pad type adult diapers, pants-type adult diapers, flat type adult diapers and others. Pad type adult diapers accounted for the majority share of the global adult diaper market in 2015 accounted for around 48.01% share of the overall market in terms of revenue.

The market growth for adult diapers and incontinence products of all types (pads and briefs included) is projected to rise dramatically over the next few years. While the global demand for adult diapers was given a market value of USD 9.24 billion in 2015, it is expected to generate revenue of USD 14.5 billion by end of 2021. Tranquility Products is ready and willing to continue creating absorbent products by following a high standard of business ethics and setting an example for our competitors and community.

By product, the global adult diapers market can be segmented in terms of product, application, and geography. By product, the market constitute reusable and disposable adult diapers. The market can be further classified into pad type diapers, pant type diapers, and flat type diapers. Growing urinary incontinence among adults and increasing unwillingness to go through intrusive procedures are driving the global adult diapers market growth. Additionally, increasing use in conditions such as diarrhea, mobility impairment, and dementia is anticipated to impact product growth positively. Primarily used in medical centers for patients suffering from different ailments adult diapers help in preventing leakage, maintain body fluid level and improve comfort.

Increasing use of adult diapers for purposes other than medical issues is also expected to boost its demand and customer acceptance. The product is being used by guards on long duties who are not permitted to leave their post, divers under their diving suits, pilot on long flights and other long-hour workers.

The industry can be segmented by product into disposable, cloth, swim pants and training nappies. By type, it can be segmented into disposable and reusable diapers. The industry has been further divided into pant-type, flat-type and pad-type segments.

Disposable diapers are anticipated to remain the fastest the growing product over the forecast period. Biodegradable products are establishing strong foothold owing to both consumer convenience and environmental regulatory requirements. Varieties in disposable diapers include super-absorbent, ultra-absorbent and regular. In terms of users, women have been anticipated to be the most significant contributor to the rising consumption owing to increased probability of incontinence among them.

The global diaper market is expected to increase at high growth rates during the forecasted period (2017-2021). The global diaper market is supported by various growth drivers, such as aging population, increasing disposable income, increase in urban population, delayed toilet training of children in developed countries, increasing literate female population, etc.

Global Adult Diapers Market Revenue, 2015-2021 ***(USD Billion)***

An adult diaper can be classified as incontinence care products and those meant to be worn if suffering from severe diarrhea, incontinence, mobility impairment, or dementia. The growing aging population, urbanization, greater affordability, and improved awareness are the chief factors driving the global adult diapers market.

Geographically, the market is segmented into North America, Europe, Asia-Pacific, Latin America and Middle East and Africa. North America dominated the adult diapers market followed by Europe. Asia Pacific also expected to show moderate growth in the years to come. Developing countries are anticipated to experience largest growth owing to changing lifestyle and rising population. China followed by India, has the biggest population of senior citizens and is also anticipated to demonstrate fastest growth in the next few years.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Adult Pull-up Diapers provides an insight into Adult Pull-up Diapers market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Adult Pull-up Diapers project. The report assesses the market sizing and growth of the Indian Adult Pull-up Diapers Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Adult Pull-up Diapers sector in India along with its business prospects. Through this report we have identified Adult Pull-up Diapers project as a lucrative investment avenue.
