

Most Profitable Industries in India to Start Your Own Business.

List of Money Making Manufacturing Businesses

(NPCS Newsletter - Issue 082018)

Today, tens of thousands of people are considering starting a business, and for good reasons. Throughout the world, small and medium scale manufacturing is considered as a profitable business for startup entrepreneurs. Some of the most lucrative industries are light engineering, paper, food processing, rubber, leather, chemical, and agrochemical industry. Apart from these household products, some construction-related products are also in high demand. Small and medium scale industries play the significant role in the GDP.

Small and medium sized enterprises play a central role in the Indian economy. They are a major source of entrepreneurial skills, innovation and employment. SME businesses are the biggest contributor to the economy of any country and the same goes with Indian economy. In fact, SME is one of the most crucial sectors of Indian economy as far as the number of employments generated from this segment. As more than 65% of Indian population lives in rural and semi-rural areas, small business becomes a major source of income for many residing in these areas. After agriculture, small business in India is the second largest employer of human resources.

that you can initiate as
micro, small, and medium
scale basis.***

Projects Covered in this Issue

- **Aluminium Cans Manufacturing**
- **Cashew Nut Shell Oil**
- **Edible Oil Refinery from Crude Palm Oil**
- **Readymade Khaini (Geeli)**
- **Coal Washery Unit**
- **Acrylic Resin (Emulsion Type)**
- **Corrugated Cartons**
- **Arabic Gum**
- **Sulphuric Acid Plant including Mfg. of Chlorosulphonic Acid, 23% Oleum**

Projects Covered in this Issue

- **Hot Melt Adhesives for Corrugation Board**
- **Magnesium Sulphate**
- **Gypsum Plaster Board**
- **Copper Cathode from Copper Scrap**
- **Macaroni, Sapghetti, Vermicelli and Noodles**
- **Roller Flour Mill with Packaging (Automatic Plant)**
- **Adhesive (Fevicol Type)**
- **Linear Alkyl Benzene Sulphonic Acid**
- **Chili Oil**
- **Dry Fruits Processing (Cashew, Almond, Walnut, Raisins (Kishmish/Munnakka) and Figs)**
- **Virgin Coconut Oil**

Detailed Project Report On Aluminium Cans Manufacturing

Aluminium cans are every day commodities that people come across on a regular basis, whether it's while they are grocery shopping, taking their lunch break, or pondering in front of a vending machine. The aluminium beverage can is now the popular choice for carbonated and still soft drinks, mineral waters, beers and lagers. The process involves drawing and ironing of a sheet or blank of a material, untinned low-carbon cold-rolled steel, to develop a tabular piece. The tabular piece acts as the can body.

The packaging industry in India is estimated to reach \$73 billion by 2020, from \$32 billion in 2015, says a study by Federation of Indian Chambers of Commerce & Industry and Tata Strategic Management Group. [Read more](#)

Detailed Project Report On Cashew Nut Shell Oil

Cashew Nut Shell Liquid (CNSL) is a versatile by-product of the cashew industry. The nut has a shell of about 1/8 inch thickness inside which is a soft honey comb structure containing a dark reddish brown viscous liquid. It is called cashew nut shell liquid, which is the pericap fluid of the cashew nut. It is often considered as the better and cheaper material for unsaturated phenols. CNSL and the resins made from it are widely used in laminations, brake lining, electrical insulations, surface coatings, printing inks etc. and therefore find a ready market.

Indian cashew nut industry has big market for CNSL. CNSL oil is used in industries hence there is good demand from industrially developed countries. [Read more](#)

Detailed Project Report On
Edible Oil Refinery from Crude Palm Oil

Palm oil is edible oil which is extracted from the pulp of fruit of oil palms. The color of pulp is red. That's why crude palm oil is naturally similar to pulp color because of high inactive vitamin A content. It is different from kernel oil or coconut oil. Commonly it is combined or mixed with coconut oil to make highly saturated vegetable fat, which is also used for cooking purposes. Refining process is a necessary step for the production of edible oils and fats products. The objective of this process is to remove the impurities and other components, which will affect the quality of finished product.

Indian edible oil industry is composed of some 15,000 oil mills, 600 solvent extraction units, and 250 vanaspati units and over 600 refining units. [Read more](#)

Detailed Project Report On Readymade Khaini (Geeli)

Khaini chewing, a form of smokeless tobacco is viewed to be relatively harmless by the rural folk. Khaini is tobacco with slaked lime. The negative consequences of stress as a risk factor for cardiovascular disease and reduced human performances are well studied. Stress is known to change the balance existing between the sympathetic and the parasympathetic divisions of the autonomic nervous system. Khaini chewers are likely to suffer from mental and physical exhaustion, leading to stress.

The data revealed that khaini consumption in Maharashtra increased to 15.5% in 2016-2017 from 14.5% in 2009-2010. Similarly, consumption of gutkha increased from 8.3% to 8.6%. [Read more](#)

Detailed Project Report On Coal Washery Unit

Coal Washing Unit is one of the most important units for up-gradation of Coal in sense of fed value by reducing of ash content in the Coal. It is basically associated with sieve of position to get the quality Coal. Qualities of coal depend upon its ash content. Coal washing is a process of separation mainly based on differences in specific gravity of coal and associated impurities like sand, ash etc. The course will deal theoretical and practical aspects of coal washing processes and equipment.

Coal demand in 2020 is unlikely to be anywhere near 1,500 MT for domestic coal. The Government of India plans to achieve a domestic coal production target of 1.5 billion tonnes by 2020—an ambitious growth from 2015’s production of 612.4 million tonnes. [Read more](#)

Detailed Project Report On Acrylic Resin (Emulsion Type)

Acrylic resins have become a key component in global manufacturing. Acrylic resin refers to a group of thermoplastic materials derived from compounds such as acrylic acid or meth acrylic acid. The acrylic derivatives are added to heated plastic to create a material that can be used for many purposes. The material that is created from the thermoplastic acrylic mixture has high heat and impact resistance, as well as good clarity and UV resistance. The use of acrylic resins has continued to grow in popularity across the globe, and it is considered an affordable yet durable material for manufacturing various products.

Acrylic resins are mostly used in the paints and coating industries.

Detailed Project Report On Corrugated Cartons

Corrugated boxes form an integral part of the packaging industry. These are found everywhere helping people shift both domestic as well as industrial items safely from one place to the other. Corrugated boxes form an integral part of the packaging industry. These are found everywhere helping people shift both domestic as well as industrial items safely from one place to the other. A corrugated box is quite strong and can withstand huge weights. These boxes are especially made of cardboard. Also there are partitions which basically protect items inside and hold them in place so as to avoid damage.

The global market for corrugated boxes is forecast to grow from \$63.29 billion in 2016 to reach \$76.76 billion by 2021, [Read more](#)

Detailed Project Report On Arabic Gum

Gum arabic is a complex mixture of macromolecules of different size and composition (mainly carbohydrates and proteins). Gum Arabic, also known as Gum Acacia, is a natural gum harvested from the exterior of Acacia trees in the form of dry, hard nodules up to 50 mm in diameter, and ranging from almost colourless to brown. Its unique properties endow it with a wide range of uses in food, beverage, pharmaceutical and industrial applications.

The growth of the global market is driven by the rising income levels, multiple functionalities of gum arabic in the food & beverages industry, and the rising awareness regarding the medicinal benefits of gum arabic. [Read more](#)

Sulfuric acid or sulphuric acid) is a mineral acid with molecular formula H_2SO_4 . It is a colorless, odorless, and syrupy liquid that is soluble in water, in a reaction that is highly exothermic. Chlorosulfuric acid is the inorganic compound with the formula HSO_3Cl . It is also known as chlorosulfonic acid, being the sulfonic acid of chlorine. Oleum or fuming sulfuric acid, is a solution of various compositions of sulfur trioxide in sulfuric acid, or sometimes more specifically to disulfuric acid (also known as pyrosulfuric acid). Oleum is an important intermediate in the manufacture of sulfuric acid due to its high enthalpy of hydration.

India Sulphuric Acid Market to Grow at CAGR 3.35% till 2025. Growing agriculture sector, [Read more](#)

Detailed Project Report On Hot Melt Adhesives for Corrugation Board

A thermoplastic, polymer based adhesive which is applied in the molten state and which functions primarily by mechanical anchorage. We can define hot-melt adhesives as thermoplastic materials, solid at room temperature. When heated above their melting point, they become fluid and are able to wet the surfaces to which they are applied. Generally, a quantity of fluid hot melt is applied to one or both of the surfaces to be joined and the surfaces are brought together.

Hot Melt Adhesives be defined as adhesives that melt and flow on application of heat and solidifies on cooling to give a strong adhesion. The global market for hot melt adhesives is expected to reach 2, 379.9 Kilo tons by 2020, growing at an estimated CAGR of 5.1% from 2014 to 2020. [Read more](#)

Detailed Project Report On Magnesium Sulphate

Magnesium sulphate is an inorganic salt with the formula $MgSO_4 \cdot xH_2O$ where $0 \leq x \leq 7$. It is often encountered as the heptahydrate sulphate mineral epsomite ($MgSO_4 \cdot 7H_2O$), commonly known as Epsom salt, is a mineral. Magnesium sulphate provides both a bitter and a salty taste, depending on its concentration.

Global Magnesium Sulphate Market has very wide market in 21st century and it has been valued as \$ 10,731.05 million by 2027 with a CAGR of 4.28%. The main reason for this is the growing demand for greater quantity of food from countries such as China and India, as a result of increasing population in these countries. As a whole you can invest in this project without risk and earn profit. [Read more](#)

Detailed Project Report On Gypsum Plaster Board

Gypsum Plaster Boards are constructional sheets composed of consigned Gypsum with about 15% fibre. Its outstanding contributes are fire resistance, dimensional stability etc. Gypsum plaster boards are selected for use according to their type, size, thickeners and edge profit. The Boards may be used for example to provided dry lining finishes to masonry walls, to ceilings, to steel or timber framed partitions, or as claddings to structural steel columns and beams, or in the manufacture of pre-fabricated partition panels.

The Indian market for Gypsum Plaster Board is expected to reach about 333.64 million m² by 2021 from 221.75 million m² in 2016, registering a Compounded Annual Growth Rate (CAGR) of 8.51% during the analysis period, 2016-2021 BPB, UK took over the company and has acquired an 80% stock. [Read more](#)

Detailed Project Report On Copper Cathode from Copper Scrap

Copper cathode is a form of copper that has a purity of 99.95%. In order to remove impurities from copper ore, it undergoes two processes, smelting and electro refining. The resulting, nearly pure copper is an excellent conductor and is often used in electrical wiring. The pliable nature of copper makes it an excellent choice for electrical and audio wires, which must be thin and flexible. Aside from wire, copper cathode is also used to make copper cake, which ranges in thickness from thin foils to thick plates.

The electrical industry claims a share of about 26%. The electronics and communications take another 30% share. With building construction (9%) and transportation (8%) added, the cumulative rises to about three-fourths. [Read more](#)

Detailed Project Report On Macaroni, Spaghetti, Vermicelli and Noodles

Macaroni are made from wheat flour, carbonic salt water, pure salt, soft water and other additives. Carbonic salt water with sodium or potassium carbonate as the main constituent is an important additive giving the stickiness, elasticity, smoothness and good taste. Macaroni is a variety of dry pasta traditionally shaped into narrow tubes, produced in various shapes and sizes. Spaghetti is a long, thin, solid, cylindrical pasta. Spaghettoni is a thicker form of spaghetti, while capellini is a very thin spaghetti. It is a staple food of traditional Italian cuisine.

In India, vermicelli is made from plain wheat flour or maida but in most of the western countries. [Read more](#)

Roller Flour Mill with Packaging (Automatic Plant)

Roller Flour Milling sector processes around 12 – 15 per cent of the total wheat consumed in the country, the balance being processed through Stone Chakkis. The purpose of the milling process is to break up the grains of wheat into flour (which comes from the centre of the grain, or endosperm), bran (the skin of the wheat), and pollard (the dusty material created during the grinding process). Whole meal flour is a blend of flour, bran and pollard in the proportions in which they occur in the grain.

The Packaged Wheat Flour Market in India started breaking the old age traditions of grinding wheat at local Chakki mills by growing at a whooping Compound annual growth rate (CAGR) of 19% and may likely to be double the current size by end of this decade. [Read more](#)

Detailed Project Report On Adhesive (Fevicol Type)

Fevicol type adhesives come under the category of synthetic resins and latex adhesives are made from polyvinyl acetate is a thermoplastic, odourless, tasteless, non-toxic, essentially clear and colourless resin. The resin is unaffected by sunlight, ultraviolet light and air, furthermore it will absorb a small amount of water. WPA is the highest level of “wet strength.” This in itself is a misnomer in that all starch is water soluble.

They are also used in glueing of furniture, the clay coating of paper, non-woven fabrics and many other applications. The manufacture of adhesive from synthetic resin is simple and can be started with a very little investment. [Read more](#)

Detailed Project Report On
Linear Alkyl Benzene Sulphonic Acid

Linear Alkyl Benzene Sulphonic Acid is a largest volume synthetic surfactant because of its relatively low cost, good performance, the fact that it can be dried to a stable powder and the biodegradable environmental friendliness. LAB Sulphonic Acid is an anionic surfactant widely used in formulation of all ranges of Domestic Detergents Powder, Cake & Dish wash cleaners. Due to its high active matter, miscibility with water and low salt content, it is also used in formulation of Industrial & Household liquid cleaners as well as in numerous industrial applications like as a coupling agent and as an emulsifier for agricultural herbicides and in emulsion polymerization. Linear AlkylbenzeneSulfonate (LAS) Market size is poised to exceed USD 9 billion by 2024. [Read more](#)

Detailed Project Report On Chili Oil

Chili oil is essentially dried chilies, preserved in oil. It adds a delightful kick to whatever dish you're using it in. Commonly used as a finishing oil for risottos, pastas and seafood, it's also a great oil for any stirfry. Chili also called red pepper belongs to the genus capsicum, under the solanaceae family. They are believed to have originated from South America. Chilies are referred to as chilies, chile, hot peppers, bell peppers, red peppers, pod peppers, cayenne peppers, paprika, pimento, and capsicum in different parts of the world.

Total world chili oil demand to increase by 1.4 million bpd, which makes India's expected growth of some 300,000 bpd the most significant source of growth for crude producers outside of China's expected lift in demand of about 380,000 bpd. Entrepreneurs who invest in this project will be successful. [Read more](#)

Detailed Project Report On Dry Fruits Processing

(Cashew, Almond, Walnut, Raisins (Kishmish/Munnakka) and Figs)

Cashew nuts are a popular snack and food source. Cashews, unlike other oily tree nuts, contain starch to about 10% of their weight. This makes them more effective than other nuts in thickening water-based dishes such as soups, meat stews, and some Indian milk-based desserts. The almond fruit measures 3.5–6 cm (1–2 in) long. In botanical terms, it is not a nut, but a drupe. The outer covering or exocarp, fleshy in other members of Prunus such as the plum and cherry, is instead a thick, leathery, grey-green coat (with a downy exterior), called the hull. A raisin is a dried grape. Raisins are produced in many regions of the world and may be eaten raw or used in cooking, baking, and brewing. [Read more](#)

Detailed Project Report On Virgin Coconut Oil

VCO is considered a saturated fat (fat similar to animal sources), however, it has a unique composition of high percentage of medium chain triglycerides (MCTs). MCTs, unlike long chain triglycerides, are easily converted into energy by the liver and have been proven to increase the metabolic rate of an individual. Fatty acid composition of VCO is predominantly Lauric (48%). Monolaurin, derived from the Lauric Acid, has been known to have antimicrobial, antiviral and antifungal effects in the body.

The virgin coconut oil market in Kerala and Tamil Nadu is on a steady line this week with prices remaining at 14,000 a quintal and 14,100 respectively. The global virgin coconut oil market size to grow steadily at a CAGR of around 10% by 2021. [Read more](#)

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here's we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website

www.entrepreneurindia.co that is "Instant Online Project Identification and Selection"

NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.

NIIR PROJECT CONSULTANCY SERVICES

An ISO 9001:2015 Company

www.niir.org

www.entrepreneurindia.co

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.

We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.

What do we Offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Industry Trends*
- *Market Research Reports*
- *Technology Books and Directory*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we Different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- *Public-sector Companies*
- *Corporates*
- *Government Undertakings*
- *Individual Entrepreneurs*
- *NRI's*
- *Foreign Investors*
- *Non-profit Organizations, NBFC's*
- *Educational Institutions*
- *Embassies & Consulates*
- *Consultancies*
- *Industry / trade associations*
