**The global jute bag industry is currently at a nascent stage with encouraging growth aspects. The demand for jute bags has witnessed a surge over the past few years, particularly in the European Union. This can be attributed to the growing environment consciousness in the region. The imports of jute bags in non-producing countries have also been facilitated by the ban on plastic packaging materials and bags. Additionally, the benefits offered by jute bags such as their biodegradability, durability, low cost, high strength, etc. have further supported the market growth.**

**The global jute bag market reached a value of US\$ 1.4 Billion in 2016, exhibiting a CAGR of around 11% during 2009-2016.**

**The global jute market on the basis of type, covering jute sack bags and jute shopping bags. Currently, jute sack bags dominate the market, accounting for the majority of the sales volume. The market has further been segmented on a regional basis and includes India, Bangladesh, China and Others. Amongst these, India holds the majority of the shares, representing the leading producer of jute bags.**

**On account of growing awareness amongst consumers, particularly due to the environmental factors like surging pollution levels and depletion of the ozone layer, the demand for jute bag is witnessing a strong growth. In addition to this, government of several emerging nations have been undertaking initiatives in order to ban the use of plastic bags.**

**Moreover, they are levying penalties on shops which are selling and continuing to provide goods in plastic bags. As demand for plastic bag is inversely proportional to the demand for jute bag, these initiatives have led to a surge in the demand for jute bags. Further, the popularity of jute bag particularly in the Asia Pacific region is positively influencing its demand in the western countries. Apart from this, manufacturers are constantly coming up with customized bag options, experimenting in terms of style, design, shape and size, so as to widen their consumer-base.**

**There is tremendous demand of jute shopping bag. Proportionately supply of jute shopping bag is from the tiny and small scale sector. There is no scale large industry engaged only in the production of jute shopping bags.**

**Supply of jute shopping bag is mainly from the village co-operative tiny sector. In future there is much more scope of jute shopping bags due to replacement of plastic bag.**

**Jute Bags is a Good product to Export. People often find some Different product to export. This can be a good option for exporters. As right now there is less competition in this product. You can easily gain competitive advantage over this.**
