## Production of Glycerol Monostearate (NSE/SE Grade).

### GMS Emulsifier

*Glycerol Monostearate Market Estimated  
to Cross USD 85.30 Million in 2022.*

Glycerol Monostearate

# Introduction

**Glycerol monostearate, commonly known as GMS, is an organic molecule used as an emulsifier. GMS is a white, odorless, and sweet-tasting flaky powder that is hygroscopic. It is a glycerol ester of stearic acid. It occurs naturally in the body as a product of the breakdown of fats by pancreatic lipase, and is also found in fatty foods.**

**GMS is a food additive used as a thickening, emulsifying, anti-caking, and preservative agent; an emulsifying agent for oils, waxes, and solvents; a protective coating for hygroscopic powders; a solidifier and control release agent in pharmaceuticals; and a resin lubricant. It is also used in cosmetics and hair care products. GMS is largely used in baking preparations to add "body" to the food. It is responsible for giving ice cream and whipped cream its smooth texture. It is sometimes used as an anti-staling agent in bread.**

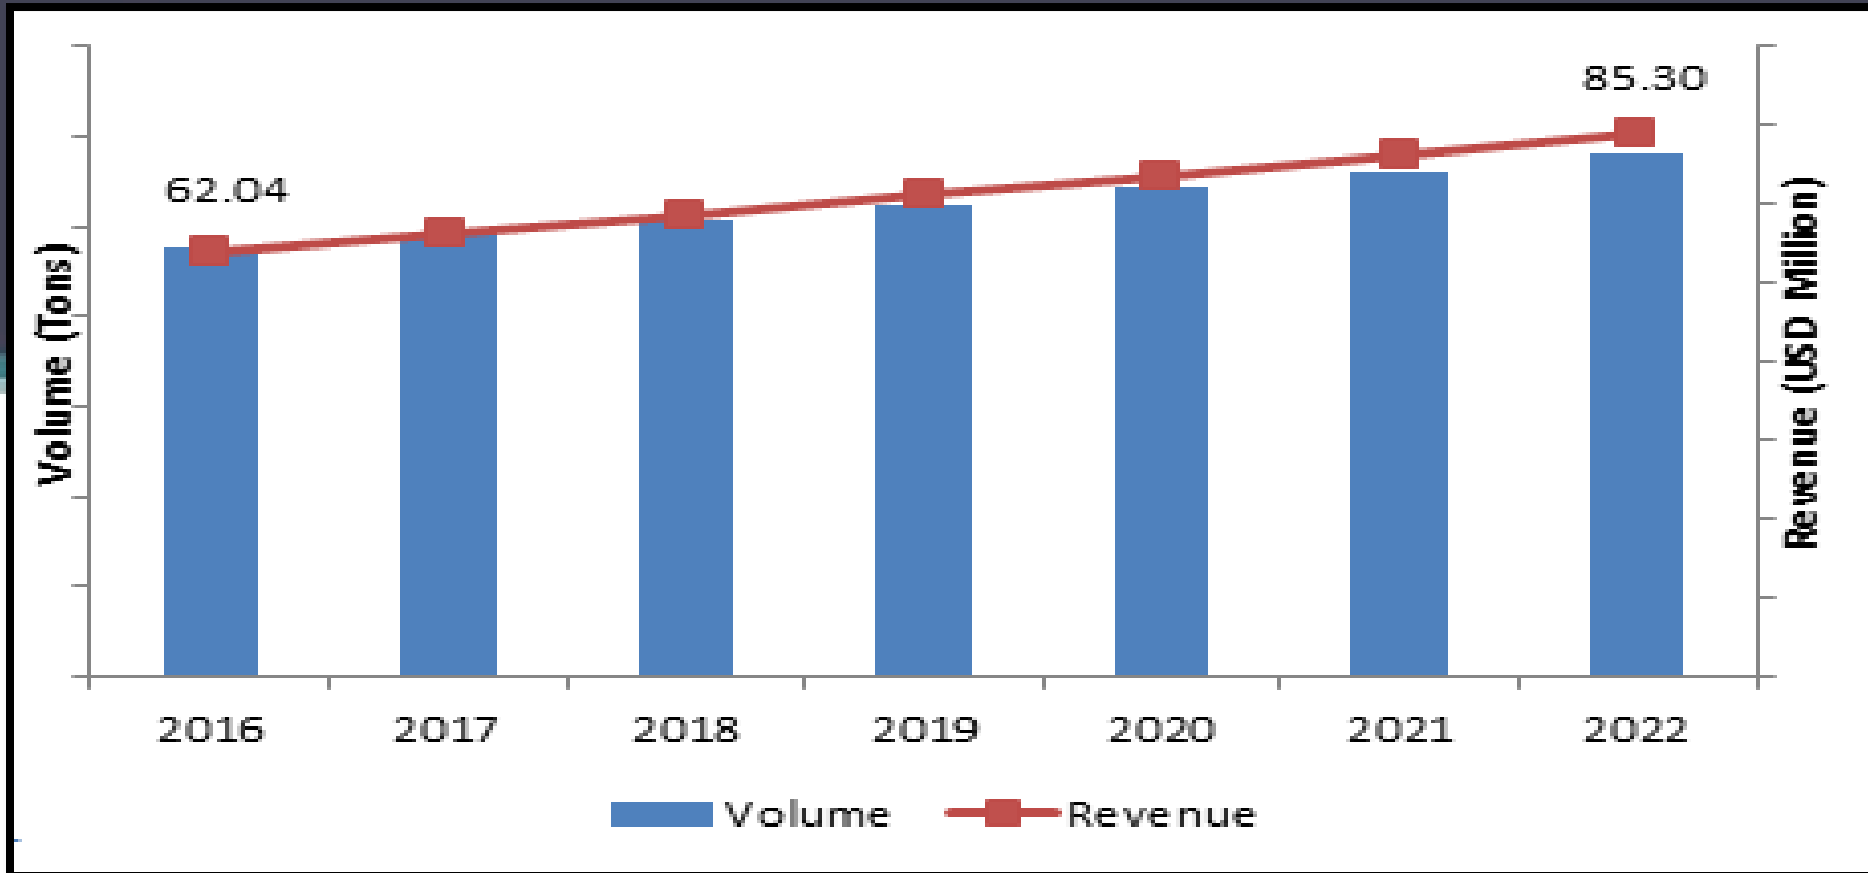

# Market Outlook

**India Glycerol Monostearate Market is expected to Reach USD 85.30 Million in 2022. India is expected to record the fastest growth in the future. This can be attributed mainly to the growing fascination of western fast food trend in the country. India is predicted to hold a major share of the total glycerol monostearate market owing to the sharp rise in dairy industry and the presence of major glycerol monostearate manufacturers in this region. There has been tremendous growth in the food industry in India which is expected to spur the growth of the glycerol monostearate market in the coming years.**
